

Quantum Pendant Scalar Energy

ORIGINAL Scalar Energy Pendant
- A unique invention -

Feeling is believing!

Recharge your life.

***Energy *Strength *Balance* Flexibility*
Focus***

The Scalar Pendant is uniquely produced using Japanese Mineral Science Technology to provide scalar frequencies. The pendants contain high quality bonded volcanic minerals that efficiently emit the powerful scalar energy.

Scalar energy is the energy of the future and is an application of healing energy as nature intended. Though it is not fully understood, one cannot deny the tremendous effects it has on our bio-field by promoting a positive flow of energy. This helps to maintain energy balance or repair our body that has been weakened by daily exposure to negative energy such as radiation from cell phone, television, computer, x-ray, microwave and electrical appliances.

Scalar Energy has a whole range of profound beneficial effects on the human body.

The Scalar Pendant is durable, easy to wear or carry and can even energize your drinking water. The scalar energy in the Scalar Pendant does not diminish.

In fact it provides you consistent energy for a lifetime ...

Disclaimer:

These products are not a medical device, and not intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease.

How does Scalar Energy work?

The Quantum Pendant is created from technically engineered natural mineral particles which are specifically graded to isolate certain sized particles, targeted for their inherent resonance. The particles are then recombined using Nano Fusion technology in specific ratios, fused and structurally bonded together at a molecular level by using several high heat fusion methods.

The combination of the minerals and the fusion techniques produces a catalytic conversion of energy, developing a long lasting natural scalar resonance which has the ability to be transferred to any liquid, renewing the natural nano molecular structure.

The renewed molecular structure is similar to those found in healthy natural spring water. Like fruit and vegetables the body slowly loses its nano molecular structure, as we age the cells have less ability to absorb liquid, the cell can be re-hydrated at a molecular level to provide energy liquid, using the Quantum Pendant.

Quantum Pendants are not magnetic, not electrical and require no maintenance. They emit a scalar energy field including the essential k40 resonance; they are inert and are not radioactive.

Simply put: The Quantum Scalar Energy Pendant is made from natural minerals (volcanic lava) that are fused and structurally bonded together at a molecular level. It produces scalar energy that helps to enhance the body's bio-field. Quantum Scalar Energy Pendant promotes positive flow of energy and helps to maintain energy balance. It helps to restore energy that has become weak in the body. By restoring the energy balance in the body this pendant helps one to maintain health and well-being.

What does the Scalar Pendant do?

The scalar energy from the pendant works outwardly and within the body.

Outwardly, upon contact with your body the Scalar Pendant instantly enhances the body's bio-field dramatically increasing your Strength, Balance, Flexibility, Focus and Energy.

Inwardly it works to facilitate cell permeability and thereby enhances the many physiological functions of the cells in the body.

- Improves cell wall permeability thus facilitating the intake of nutrients into each and every cell and the elimination of waste from each and every cell.
 - Increases overall body energy levels as a result of increasing cellular energy.
- Cleanse the blood improving chylomicron levels (protein/fat particles floating in the blood) and triglyceride profiles and fibrin patterns.
 - Improve immune function as proven in laboratory studies.
- Improve mental focus as demonstrated by increased amplitude of EEG frequencies.
 - Balance out the two hemispheres of the brain as measured by EEG tests.
- Works as an antidepressant since it inhibits the uptake of noradrenalin by PC 12 nerve cells.
 - Fights low energy cancer cells.

Health Benefits:

- Restores balance and harmony to the body
- Reduces inflammation
- Promotes unclumping of cells
- Enhances & Improves blood circulation
- Enhances immune and endocrine systems
- Has the ability to destroy viruses and bacteria
- Enhances cellular nutrition and detoxification
- Enhances cellular permeability
- Increases energy
- Helps to protect DNA from damage
- Helps to retard the aging process
- Helps to fight cancer cells
- Re-charges & Strengthens the body's bio-field preventing electro-magnetic waves from affecting one's health
- Increases focus and concentration
- Improve stamina, endurance & strength
- Alleviate soreness, aches & pains, and improve flexibility
- Increases metabolism
- Energize blood cells & reduce "sickness"
- Calms the mind & improves focus
- Neutralises negative energies
- Achieve better health and greater vitality
- Relieves stress and strengthens the immune system
- Turns the water in your body into healthy, energized, small-clustered water
- Helps to restructure the water in your body so that smaller clusters can more effectively energise the body.

How to use the Scalar Pendant:

Wear it on a chain around your neck or carry it in your pocket. The scalar energy from the pendant works outwardly and within the body. Outwardly scalar energy enhances the body's bio-field. Inwardly it works to facilitate cell permeability and thereby enhances the many physiological functions of the cells in the body.

You can also place the Pendant directly on an affected body area (e.g. knee, back, shoulder, ankle, etc.) to relieve stiffness or soreness.

- Place it over the forehead for headache and relaxation
- Place it over the abdomen for stomach-ache and period pain Quantum Pendant turns the water in your body into healthy, energized, small-clustered water!

Quantum Pendant does more than just break down the water molecules and energizing your drinking water. When you wear it, it keeps the water in your body grouped into small cell-penetrating clusters. These tiny clusters of water easily pass through cell membranes, carrying nutrients & oxygen into our cells, and waste & toxins out. This easy passage of water into and out of our cells is what keeps the cells clean, young and healthy.

Other uses:

Use water energized with Quantum Pendant for washing your face to improve your complexion

Place it underneath your skincare bottles to improve their absorption and efficacy

Leave it in the refrigerator to keep your food fresher longer

1. Place the Pendant at each of the four corners of your bed to create an energy field.

Be energized while you sleep. You'll rest better, wake up feeling fresher with more vigour.

2. Place the Pendant in your refrigerator to keep food fresh longer and get rid of odours.

Laboratory tests found that leaving the Pendant in the refrigerator can keep fruits and vegetables fresh for longer. It can also lower the temperature, saving electricity.

3. Place the Pendant underneath your skin care bottles to improve their absorption and efficacy.

Place the Pendant underneath your skin care bottles to assist breaking down the molecules of the ingredients for improved absorption.

4. Give a pendant to older friends and relatives.

The elderly enjoy much better balance and stability when they wear the Pendant.

The Pendant enhances balance, improves circulation which brings relief from cold hands and feet.

5. Place the Pendant over your eyes to alleviate eye puffiness and discomfort.

The Pendant improves metabolism and blood circulation, thus relieving eye tension and discomfort.

6. Place it on your waist to increase energy levels and relieve stomach discomfort.

Placing the Pendant over the abdomen helps you to attain better energy levels and relieves bloatedness and discomfort.

7. Children and athletes who wear the Pendant experience improved energy, flexibility and concentration levels.

Children who wear the Pendant have improved mental focus and perform better in class. Athletes can achieve better performance with improved flexibility, strength and concentration.

8. Place the Pendant in your aquarium to keep your fish healthy.

The Pendant in your aquarium oxygenates, energises and maintains the water, keeping to fish healthier, more energetic and their colours more vibrant.

Are Scalar Energy Products Safe?

Absolutely, there is nothing unnatural about Scalar Energy - It has been around since the creation of the universe.

Blood cells of normal modern people always clumps together & this will reduce oxygen level to the cells. After wearing our scalar energy product, the blood cells unclump. You will be more healthy & energetic just by wearing our product.

HARMFUL ELECTROMAGNETIC FIELDS that surround you and your family.

Research shows that the electromagnetic fields have a significant disruptive effect on the natural energy levels of your body. They magnify your body's "flight or fight" responses, compounding your adrenal loads from other stressors and significantly reducing your ability to cope effectively. The unhealthy levels of EMF pollution to which we are now exposed every day, have been proven to:

- **Disrupt your natural energy levels**
- **Trigger stress responses**
- **Impair your body's natural ability to heal.**
- **Contribute to your energy depletion and fatigue.**

Golf Player - "Quantum Scalar Energy Pendant"

SCOTT SMITH : CURRENT WORLD LONG DRIVE RECORD HOLDER (539 Yards)

"Training five days a week and hitting a thousand balls a week can be hard on the body. After wearing the pendant for just a few days, I noticed less pain and fatigue. I have also noticed my swing speed jumped up a few mph on a consistent basis. I have had various pains in my shoulders and elbows since competing on the long drive tour.

Since wearing the pendant, I have very little problems with any pain."

Thai Boxing - "Scalar Quantum Pendant"
ZIDOV AKUMA : STAR OF CONTENDER ASIA & 2008 SWISS MUAY THAI CHAMPION

"Now when I train, I always drink the charged water. I feel more powerful and I train so much better. I also noticed since I started wearing the Energy Pendant, I don't have as much headaches as before. I feel much more relaxed and calm and at night I sleep much better.

Demonstration in Sports!

- Improves Performance!
- Gives increased strength & Stamina
- Better control and balance
- Particularly with golf & tennis
- Bowling, Baseball, Basketball, Football, Martial Arts, Cycling, Cricket, Rugby, Gymnastics, etc.

Before & After Water Crystal Images of Scalar Energy Charged Water by Dr. Emoto.

Before

After

Frozen Water Crystal photos of Scalar Energy charged water as developed by Dr. Emoto using his proprietary technology. The "Before" photo is of plain distilled water. There was no organized form or crystalline structure. The "After" photo is of the same distilled water but this time charged or energized by Scalar Energy products. The water crystals that are formed are beautifully structured hexagonal crystals. This shows that Scalar Energy products energize "Dead" water and turn it into "Living" water.

Quantum Pendant & Energized Water

What is really wrong with our water, today? More and more people are hearing the expression, "our tap water is dead water". Its common knowledge, of course, that our waterways, lakes, reservoirs and running water supplies are polluted wilfully and unintentionally through mankind's many activities, habits and technologies. We already know much about the health risks in chlorinated drinking water, dangers that became more widely acknowledged as we approached the end of the last millennium. Yet, still, little is commonly known about the actual energized forces at work in clean, naturally-flowing, vibrant water; which enable it to so effectively perform its functions. Before we explore further, let us remind the reader of an underlying essential function of water.

An Essential Function of Water:

One of the primary functions of water at a cellular level is to carry nutrients to organisms, and to efficiently carry away and dilute waste products. Water has also been referred to as "nature's universal solvent". It is needed by all life forms and ecologies, and by every major sustaining activity and industry of mankind.

In times past, water was deeply respected, often revered, as the essential fluid to all life - in the stages of conception, birth, growth, and sustenance, and to the healing of disease. Many naturalists, healers and scientists have spent their lives in consuming studies of the properties and essence of water - however, depending upon the breadth of their perception of the universal order of things; this has resulted in many conflicting and confusing schools of belief on the definition of truly healthy water.

What is Energized Water?

Energized water is 'alive' water, a living, functioning organism in itself. Tests with an Ohmmeter have shown that 'alive' water increases the energy level in the body of someone who has just been consuming such water. Photographs of the photon activity in water display a dramatic increase in the luminescence or light output once the water has been treated with Quantum Pendant. This increases photosynthesis (energy) in life forms that take up this water. Mankind has largely failed to understand this essential quality of health-giving, totally functioning water.

Energized water is water that has been given a highly orderly structure by natural magnetic forces found within the earth and from planetary magnetic forces, and allowed to come to the Earth's surface via its preferred, natural pathways - in mountain springs, clean, natural rivers, naturally-occurring wells, and suchlike. Water always flows in an inwardly spiralling fashion whenever it is can - in a vortex or implosion course. Whether surface flowing or underground, non-manipulated water seeks its natural course - the path of least resistance and the path of maximum nutrition; witness the flow of a river as it moves in a serpentine fashion. The great natural scientist and thinker, Viktor Schauberger of Austria had the title "The Water Wizard" bestowed upon him for his ground breaking observations as to the true nature and inherent functions of water - the secrets of the vortex.

When we drink or wash in this fresh, clear water from these unadulterated sources, we feel refreshed and very energized. There have been countless healing effects observed and documented in respect to many natural springs and rivers found all around the globe. Examples are the waters of Lourdes and the Ganges River (regardless of its seemingly polluted state!), Fatima and Medjugorje. Photographs of the photon emissions and molecular clusters of these waters show an intensely active, light-filled and cohesive structure in all cases.

Quantum Pendant energized water is potentialised, cohesive water. The dynamic forces programmed for action within energized water may be transferred to living beings (man, animal or plant life). These dynamics are to be found not in the chemical structure of this water, but in its physical structure, on the level of its molecule groups.

The quality of water is derived from its physical structure, its underlying geometry and the frequencies that it has stored. As a result of the special physical parameters of energized water, various reaction processes producing positive effects are made possible. These many beneficial effects allow the widest conceivable possibilities of application, such as the re-energizing of

damaged water supplies. To fully understand what is meant by the term "damaged" water, we must first understand certain fundamental principles about the activity in water at the molecular level.

Subtle Energy Vibrations in Energized Water, Resonance and Memory of Water

We have mentioned above that the quality of water is derived from its structure and polarity. This is influenced by magnetic resonances and other "subtle energy" resonances exposed to the water, which then are transferred into the water itself.

Even on the molecular level, water is very much an alive, animated substance. Oxygen and hydrogen form a solid body, yet an amazingly restless and excited mass. In every drop of water, electrical charges cause a never-ending colliding, joining and breaking apart of particles, (all at a rate of billions of such movements per second), as the water molecule perpetually fluctuates between the hexagonal and the spherical shape. This same "molecular dance" happens in all live water, whether within the cellular fluid or within the rainbow or storm cloud. The permanent striving for the spherical or pyramidal shape is caused by the unstable angle of 104.5 degrees, in which the hydrogen and oxygen atoms cling to each other. At a temperature below 0 Celsius, there is a tendency towards the hexagon shape, while above 0 degrees the tendency is towards the spherical shape of the water molecules. This results in a perpetual back and forth fluctuation of the structure or form of the molecule, at this difficult-to-imagine, very rapid pace, and therefore there will always be a vibration, "a never-ending, microscopic whirling dance" in all water. Consequently, researchers speak of the "open structure" of the water, a quality that allows it to comply with other elements and at the same time to dissolve them.

Water combines with almost everything it comes in contact with. Consequently, there is not such a thing as "pure" water in nature. It is always "imprinted" by momentary contact with air, or contact with any surface or substance. It is influenced and changed by such, because of its innate "memory" - that is, water's ability to retain residual vibrations of all substances contacting that water. Beneficial physical properties are produced in the water by its exposure to beneficial vibrations such as sunlight. Solar radiation results in an acceleration of the vibration of the water molecules, as they absorb energized oxygen, CO₂ and warmth. Harmful frequencies from water's exposure to chemicals or heavy metals are left to linger in water after its contact with those harmful substances, even if such substances have been removed from the water through filtering, reverse osmosis, distillation, etc.

Through this vibrational 'memory effect', or 'magnetic resonance', information of a contaminant, including information of polarity is retained in the water molecule via its vibrations. This memory effect is sustained long after the disappearance of the contaminant from the water. The only known way of reversing this memory effect is through vibrational re-energizing of the water. The direction of spin or rotation of the molecule itself is corrected, and its velocity can be accelerated in a dextrose or right-hand direction. We can say this also for any living thing, as all living things contain large percentages of water.

Electro-smog

Until recently, 'electro-smog' was not understood in its role in causing the desirable, complex molecular clusters in water to disassociate. Electro-smog is the result of the almost non-stop saturation of the atmosphere by man-made frequency transmissions - radar, satellites, short wave,

medium wave, cellular phone transmitters - the list goes on. Most scientific analysts hold up machines not sufficiently sophisticated to detect the impact of these waveforms upon living organisms, and conclude that electro-smog is not a major issue. Unfortunately, this is a 'machine to machine' reading (the impact of the output of one machine as registered on another machine), and this does not address the more subtle impacts of electro-smog. One should not use a thermometer to measure how tall one is, or at least to draw a conclusion about one's height after taking one's temperature!

Magnetism

Magnetism simply means power and information (energy) that runs from one pole to another. The universe, life forms and all of creation are built upon this principle of positive (plus) and negative (minus) poles. There are three different types of magnetic forces known in the universe:

Material Magnetism: evident in iron's storage of permanent magnetism and in the North Pole / South Pole earth magnetism. This is a limited type of magnetism, related to a place, whereby only certain energy flow and therefore only particular materials (e.g. iron) can be attracted or repelled.

Gravity Magnetism: is related to space and time and involves various types of energy flow and the attraction of all materials.

Planetary Magnetism: (some times referred to as Scalar energy) the highest degree of magnetism, which governs the order of all creation in the universe, carrying information on life and heredity found in seeds, eggs and sperm cells; and planetary forces or energies such as of the sun or moon.

This higher order of magnetism bears no relation to time or space, and programs all of Nature to absorb certain energies of information on life and heredity.

This controls, for example, the inevitable growth of a properly nurtured carrot seed into a carrot plant, such that this seed cannot become a turnip or any other type of plant. This planetary magnetism is related to the widely accepted energy humanity has named Life Force or Chi, or Prana - necessary for the existence of all life.

Different energies are produced through a combined action between the positive and negative of various magnetic forces. Energies are never actually generated, but rather simply transformed, through these combined and synergistic actions of the positive and negative polarities of the different magnetic forces explained above. This is why different matter emits different magnetic fields or magnetic resonances, or "vibrations". It is this principle that is used in the process of re-energizing dead water.

To refer back to the statement "magnetism simply means power and information" (i.e. energy), what are the primary carriers of this energy to all matter? Water, of course. Water constantly transmits and receives the energies and information throughout all matter on or around the earth, indeed to all living things.

Similar to all living beings, the earth is made up of about 80% water. In the case of harmed or 'dead' water, the all-important energetic (magnetic/polarity) functions of water for the proper functioning of all life forms are rendered defective or sometimes nonexistent.

What is Damaged Water?

Damaged water is "dead" water; water that has had the health-giving and beneficial sub molecular oscillations ("vibrations") removed from it through various forms of man's aggression, such as:

- Being forced through turbines at large reservoir exit points preceding the pipelines,
- Being forced through miles of straight, narrow, high-pressure pipes in an abnormal motion,
- Being poisoned through chlorination and other pollution, heavy metals, etc.
- Being bombarded with electro-smog.

The potent yet subtle energies that the natural, healthy water had incorporated in to its physical structure through absorption of sunlight and moonlight and its exposure to beneficial underground magnetic fields are lost in the above processes. It is lost through friction, incompatible carrying processes, electro-smog and chemical poisoning. Unfortunately, due to the memory impairment sustained by all water, these losses of energy in damaged water are becoming cumulative, around the planet. When we add to this energy depletion problem the increasing load of countless pollutants on our sick water supplies, (including chlorine and other biocides killing the much-needed beneficial microbes) the end result is chronic deterioration of the environment.

The above-mentioned "memory effect" phenomenon of water is observed on the molecular vibration level, as being present even in thoroughly or chemically cleansed water. We can keep scrubbing water with more chlorine, bromine, ozone, etc. Nevertheless, after such treatments, it is still "damaged water". It continues to bear and transfer residual sub molecular information (sometimes called "subtle energy vibrational effect") from chemicals that were previously present in it, and oscillations from all the other impositions exerted upon it by our 'modern' infrastructures.

What can we do to restore this dead water? The answers have been coming to us from visionary naturalists and quantum-scientists since the latter part of the last century, several of whom have discovered the nature of the processes that energized the water in its natural flows, (i.e. inwards, in a vortex fashion) and how to reinstate these energized, positive energies.

What is Re-energized Water?

In plain terms, re-energisation of water simply restores its natural energies. Re-energized water is 'spin' restructured water, whereby the polarity of the water molecules and the contaminants are reversed. This will bring back the beneficial vibratory qualities of this water supply without actually filtering or removing harmful substances. The directional spin of the electrons determines polarity. Counter clockwise = positive polarity & clockwise = negative polarity.

Some of the properties of energized water are:

Lowering of surface tension closer to that of cellular water (an indication of increased internal orderliness).

The density also changes, and therefore the freezing and boiling points.

The water becomes a more efficient carrier, delivering nutrients and bearing away wastes more efficiently from the systems of all living things.

It is a better cleanser and does not irritate the skin as dead water often does.

The flavour is always altered to a much more pleasant, fresh taste.

The water appears clearer.

PIP Photos of Quantum Shield by Master Yap

Without Quantum Shield

Very significant **congestions** on the forehead, back hand, ear and neck due to EMF / EMR.

Will cause discomfort and severe problems with prolonged use of cell phone.

With Quantum Shield

Significant improvement with FusionExcel's Quantum Shield. Forehead, back hand, ear and neck clear of EMF / EMR congestions.

Scalar Energy with included bio-elements

Our bodies are made of energy. To achieve and maintain vibrant health, we must protect our energy frequency and flow (or circulation) throughout the body. The principles of energy medicine originate from quantum physics. Everything in the universe is made of energy. Like all matter, the human body is not just made up of physical and chemical structures, it also has subtle energy fields known as bio-energy. We continuously radiate, absorb and conduct frequency waves of energy. Bio-energy is crucial to life and is sometimes called "the biofield", "vital energy", "aura", "Qi" (Chinese), "Prana" (India), "Mana" (Polynesian), "Barraka" (Islamic), "Ki" (Japanese), etc. To attain and maintain vibrant health, we must protect the vital bio-energy flow throughout our body. It must be free-flowing, and in perfect vibration or frequency. Any disruption or imbalance to the bio-energy pathways or "vibrations" can lead to disharmony, ill health and diseases.

Unfortunately, many factors such as stress, pollution, increasing radiation from electromagnetic waves (mobile phone, radio, computer, television, microwave oven, wireless, etc), sedentary lifestyle, poor water quality and poor diet, can weaken body's bio-energy or disrupt its flow and circulation.

Scalar Energy : Strengthens & Restores Balance to the Body's Bio-Energy

First discovered by James Clerk Maxwell in the 19th century, and proven by Nikola Tesla, Scalar energy existence is also acknowledged by Nobel Prize winner, Albert Einstein, Researchers at the Max Planck Institute, Germany, found that scalar energy unclumps and activates living cells. Scalar energy also increases cellular energy for trillions of cells and overall body energy levels, and nullifies the harmful effects of man made frequencies. Together, this helps to balance and strengthen the body's bio-energy.

Fir : Improves Circulation & Energises Body Fluid

The total length of the blood vessels in the human body is 60,000km long! Imagine blood has to travel that distance every 1-2 minutes to deliver oxygen and nutrients to all the cells and to remove waste material from them. Numerous studies have shown that FIR dilates capillary vessels, thus facilitating blood circulation for better oxygen and nutrient delivery, and for more effective toxin removal.

Some toxic gases, including carbon dioxide, or heavy metals like mercury and chlorine are easily trapped in large water clusters in the body. FIR causes the water molecules to vibrate, resulting in the breakdown of their cluster size. Consequently, trapped toxic waste gases and other toxic materials are released, and ultimately flushed out of the body. Together with the improved circulation, reduced water cluster size in the body will result in improve cellular function, better energy and vitality. For people who suffer from aches and pains, FIR offers the welcome relief of improved flexibility and mobility , and the disappearance of pain and stiffness.

Germanium : Facilitates The Conductivity & Flow of Bio-Energy

Since 1858, in Lourdes, a small town in south-western France, many purportedly found that their pain, aches and illnesses miraculously disappeared after dipping into a spring, now known as the famous "Holy Spring of Lourdes". Scientist later attributed the spring's healing properties to its high content of Germanium.

One of the most fundamental properties of Germanium is its semi-conductivity, i.e. its ability to donate and receive electrons easily. Many of Germanium's healing properties may be due to this intrinsic electronic quality. Coupled with its ability to neutralise the effects of positive ions that can impede the smooth flow of energy, Germanium is able to "correct" and facilitate the flow of the body's bio-energy, hence, increasing energy levels, and relieving pain and stiffness.

Negative Ions : Invigorate & Refresh The Mind & Body

Ever wondered why the air feels more invigorating and you feel fresher when you are at the waterfall or in the mountains? This is due to the abundance of "feel good" negative ions in the air. Research has confirmed the beneficial effects of negative ions on living things - plants grow faster and healthier, animals are calmer and perform tasks better, and humans become less stressed and more alert.

Negative ions have been found to facilitate the delivery of oxygen to cells, which stimulate bodily functions and rejuvenation. They also increase the flow of oxygen to the brain; resulting in higher alertness, decreased drowsiness, and more mental energy. Studies have also shown that negative ions help to lift mood, alleviate depression and stimulate body's reticuloendothelial system: a group of defense cells in our bodies which marshal our resistance to disease.

Unfortunately, air-conditioning, exhaust fumes, cigarette smoke, fluorescent lighting, cellular phones, electrical and electronic equipment, TV and computer screens - all these adversely deplete negative ions from our surroundings and instead increase positive ions, which have been linked to muscle and joint aches, irritability, mood swings, headaches, insomnia, lethargy, lessened efficiency and general lack of health.
